

GALAXIA MISSION SYSTEMS SELECTED FOR PRESTIGIOUS SOCAL-CANADIAN SPACE ACCELERATOR PROGRAM

HALIFAX, NS – GALAXIA Mission Systems, a leading innovator in the design and development of modern computation hardware and software for small satellites, is thrilled to announce its inclusion in the SoCal-Canadian Space Accelerator, led by Mandala Space Ventures. The prestigious program, initiated by the Canadian Trade Commissioner Service (TCS) with the support of the Canadian Space Agency (CSA) and Innovation, Science and Economic Development Canada (ISED), is set to propel GALAXIA into new frontiers within the emerging new-space economy.

GALAXIA is one of the 10 carefully selected Canadian space startups chosen for this two-month accelerator, aimed at supporting small and medium enterprises looking to raise under \$20 million USD and foster growth and expansion in Southern California. The accelerator will commence on February 12th, followed by an in-person pitch event in Los Angeles on April 4th and additional programming at the Colorado Springs Space Symposium.

GALAXIA's team is honored to be part of this esteemed cohort, contributing to the evolution of space technology and forging meaningful connections and exposure within the Southern California space ecosystem. The accelerator presents a unique opportunity for GALAXIA to showcase its expertise in modern computation hardware and software, advancing the company's mission to make real-time space access simple, effortless and more accessible than ever before.

"We are excited to participate in the SoCal-Canadian Space Accelerator and connect with key players in the U.S. space sector," said Arad Gharagozli, Founder and CEO at GALAXIA Mission Systems. "This program is in complete alignment with our vision of pushing the boundaries of space technology, and we look forward to building lasting partnerships and contributing to the growth of the global space industry."

About GALAXIA

GALAXIA Mission Systems, is a Canadian-owned, space computation company, making real-time space access simple, effortless and more accessible than ever before. Through the development of innovative products and groundbreaking technology, GALAXIA is redefining how data can be collected and processed from space and who has access to it. Driven by their mission to democratize space, GALAXIA is disrupting current industry practices by breaking down the barriers that small to medium sized businesses face and paving the way with sophisticated technology and a unique pay-per-use business model.
